

Orbit II

QUICK

START

GUIDE

Package content

- Device
- Data cable
- Screen protector
- USB power adaptor
- Headset
- Quick start guide

 Items supplied with the device and their images may vary by region

Accessing more information

To view the full user manual on your device, launch the Settings app and tap User Manual.

- The user manual may not be available depending on the web browser or service provider.
- You may incur additional data charges for accessing the internet.

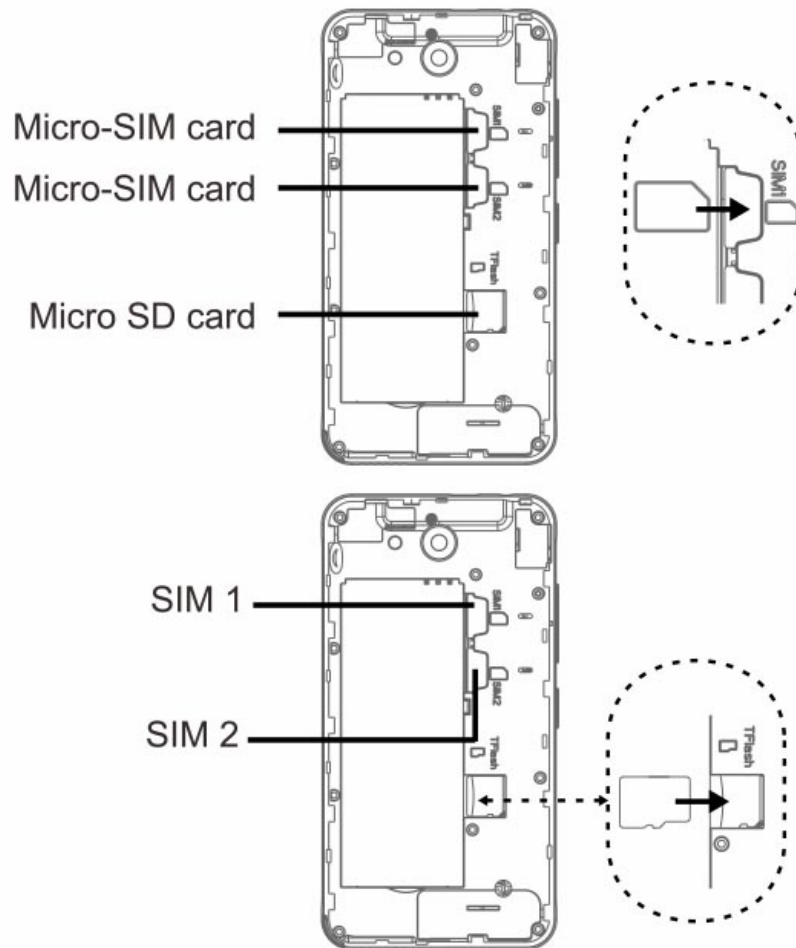

Device layout

To power on the device, press and hold the Power key for a few seconds.

Installing a Micro-SIM and a Micro SD card

Gently remove the battery door from the phone, slide and lift the SIM tray door and place the SIM card as shown in the picture below:

- If the card is not firmly positioned in the tray, the card may fall out.

SIM cards and MicroSD card are sold separately.

Charging the battery

It is recommended to charge the battery until full before using the device.

Navigation buttons

- The navigation buttons located beneath the display are active when the device screen is on.

● You will be provided the option to restore your data from another device when logging in to your Google account in the setup wizard, please make sure you have selected the Sync option on the device you wish to transfer the data from.

The available capacity of the internal memory may vary from the specified capacity due to the size operating system and default apps.

Content may on your device depending on location, service provider, or software version, and is subject to change without prior notice.

Safety Information

Read all safety information before using the device to ensure safe and proper use.

Warning

Follow the warning information provided below to prevent incidents such as fire or explosion.

- Do not expose the device to physical impact or damage.
- Use manufacturer-approved batteries, chargers, accessories, and Supplies.
- Prevent the multipurpose jack and battery terminals from contacting conductive elements, such as metal or liquids.
- Do not turn on or use the device when the battery compartment is exposed.

Follow the warnings below to prevent injury to people or damage for the device.

- Do not allow children or animals to chew or suck the device.
- If the device has a camera flash or light, do not use it close to the eyes of people or animals.
- The device can be used in locations with an ambient temperature of 0 °C to 35 °C. You can store the device or reduce the battery's lifespan.
- Do not use your device in a hot environment or near fire.
- Comply with all safety warnings and regulations regarding mobile device usage while operating a vehicle.
- To protect your eyes, do not stare at the iris recognition LED light when your eyes are less than 20 cm away from the device.

To prevent possible hearing damage when using a headset, do not listen to sound high volume for long periods.

To view the full safety information including device and battery disposal instructions, launch the **Settings** app and tap **About phone** → **Legal information** → **Safety information**.

You can download and install the firmware update to upgrade your device's software with the firmware over the-air (FOTA) service. To check for the firmware update, launch the **OTA Update Service** app and tap **Available Update..**

Specific Absorption Rate (SAR) certification information

Your device conforms to U.S. Federal Communications Commission (IC) standards that limit human exposure to radio frequency (RF) energy emitted by radio and telecommunications equipment. These standards prevent the sale of mobile devices that exceed a maximum exposure level (known as the Specific Absorption Rate, or SAR) of **1.6** W/kg.

In normal use, actual SAR is likely to be much lower, as the device has been designed to emit only the RF energy necessary to transmit a signal to the nearest base station. By automatically emitting lower levels when possible, your device reduces your overall exposure to RF energy.

The IC has granted an Equipment Authorization for this model device based on the compliance of all reported SAR levels with the IC RF exposure guidelines. This device has a IC ID number: 22079-F40G2 [Model Number: Orbit II F40G2] and the specific SAR levels for this device can be found at the following IC website: www.canada.ca/en.html
